

I AM NCR NETWORK AND SECURITY SERVICES

Address risks proactively without impacting day to day business activities.

NCR Network and Security Services offers a multi-layered defense solution to help business operators secure their networks, detect security risks and threats, prevent security compromises all while engaging customers and enabling web activity reporting.

Engage customers with secure Wi-Fi capabilities

Many consumers choose where they do business based on reliable WiFi connectivity. NCR Network and Security Services enables you to offer secure wireless connectivity without disrupting your critical business applications. You can capture valuable customer data points and feedback about their experience. Inviting new customers to join your loyalty program or sending current customers a special offer is a great way to engage and keep top of mind.

Secure reputation and customer data with PCI compliance

Cyber attacks are more sophisticated and common than ever. NCR Network and Security Services can help prevent data breaches and security compromises as well as address PCI-DSS compliance requirements. This multi-layered defense solution not only protects your customers' card data, it also protects your business' reputation.
